SUMMARY

Software Developer with hands-on experience in Java, Python, and SQL, building scalable full-stack web applications. Skilled in HTML, CSS, and JavaScript, with a strong foundation in OOP and database management. Experienced in API integration and structured data handling. Motivated about solving real-world problems and collaborating effectively in team-driven environments.

Skills

- Languages : Python ,Java, C, SQL
- Frontend : HTML, CSS, JavaScript
- Backend : Spring Boot
- Database : MySQL
- Tools : Android Studio, IntelliJ, Eclipse, Git, Github, Excel, MS Office(Word and Powerpoint)
- Concepts : OOP, DBMS, Authentication, Rest APIs CRUD Operations

PROJECTS

Traffic Buddy

Group Project | Java, Spring Boot, HTML, CSS, JavaScript

- Developed backend services using Spring Boot and OpenRouteService API for smart route calculation.
- Built and structured RESTful APIs for route processing and third-party API communication.
- Connected frontend and backend modules to deliver real-time route visualization.
- Applied features to avoid tolls and highways for optimized route selection.

Project Link : <https://github.com/Devesh517/TrafficBuddy>

Bio Track

Group Project | Java, JDBC, MySql

- Designed a multilingual health monitoring system for secure management of user medical records.
- Organized and maintained structured health data using MySQL, ensuring efficient storage and retrieval.
- Enabled real-time tracking and update of key health metrics including heart rate, blood pressure, and sugar levels.
- Implemented support for 5 languages, enhancing accessibility and user inclusivity.

Project Link : <https://github.com/Devesh517/Bio-Track>

Rewear

Solo Project | HTML, CSS, JavaScript

- Created a web-based platform allowing users to exchange and donate unused clothing within a community.
- Crafted a responsive user interface for seamless item listing, browsing, and swap interactions.
- Introduced a point-based reward mechanism to boost engagement and participation.
- Built as part of Odoo Hackathon 2025, focusing on sustainable and community-driven solutions.

Project Link : <https://github.com/Devesh517/OdooHackthon>

School Management System

Solo Project | Python, OpenPyxl, ReportLab

- A console-based system managing 100+ students, 10+ teachers, and multiple classes with sections using Python and OpenPyXL.
- Simplified attendance and academic records, improving accuracy and reducing manual effort.
- Established role-based access (Admin/Teacher) with input validation for secure data handling.
- Generated PDF reports (report cards, salary slips) with automated grading, percentages, and deductions.

EDUCATION

Bachelor's of Computer Application(BCA)(2023-2026)

Dezyne École College | CGPA : 7.8(Till Now)

Class XII | 2022-2023 | 75%

Maheshwari Public School

Class X | 2020-2021 | 81%

Maheshwari Public School

CERTIFICATION

HackerRank Java Certification : OOP Concept

HackerRank SQL Certification : Queries, Joins

Forage (JP Morgan Chase & Co) : Project Setup, Rest API Integration, Rest API Controller
